

# *Principles of Conservation Biology* THIRD EDITION

**Martha J. Groom**

*University of Washington  
Bothell and Seattle*

**Gary K. Meffe**

*Department of Wildlife Ecology and Conservation  
University of Florida*

**C. Ronald Carroll**

*Director for Science in the River Basin Science and Policy Center  
University of Georgia*

*Sinauer Associates, Inc. • Publishers  
Sunderland, Massachusetts U.S.A.*

# ***Brief Contents***

## ***UNIT I***

### ***Conceptual Foundations for Conservation Biology 1***

---

- 1 What Is Conservation Biology? 3**
- 2 Global Biodiversity 27**
- 3 Threats to Biodiversity 63**
- 4 Conservation Values and Ethics 111**
- 5 Ecological Economics and Nature Conservation 137**

## ***UNIT II***

### ***Focus on Primary Threats to Biodiversity 171***

---

- 6 Habitat Degradation and Loss 173**
- 7 Habitat Fragmentation 213**
- 8 Overexploitation 253**
- 9 Species Invasions 293**
- 10 Biological Impacts of Climate Change 333**
- 11 Conservation Genetics 375**

## ***UNIT III***

### ***Approaches to Solving Conservation Problems 417***

---

- 12 Species and Landscape Approaches to Conservation 419**
- 13 Ecosystem Approaches to Conservation 467**
- 14 Protected Areas 509**
- 15 Restoration of Damaged Ecosystems and Endangered Populations 553**
- 16 Sustainable Development 591**
- 17 The Integration of Conservation Science and Policy 625**
- 18 Meeting Conservation Challenges in the Twenty-First Century 661**

# Contents

## UNIT I

### Conceptual Foundations for Conservation Biology 1

---

#### CHAPTER 1

#### What Is Conservation Biology? 3

*Gary K. Meffe, C. Ronald Carroll, and Martha J. Groom*

---

##### Expanding Human Demands on Earth 3

##### Responding to Global Change: The Field of Conservation Biology 6

##### A Brief History of Conservation Biology 7

**ESSAY 1.1** A PERSPECTIVE ON THE ROLE OF ACADEMIA IN CONSERVATION BIOLOGY 8

##### Conservation in the United States 10

*Modern conservation biology: A synthesis* 12

**ESSAY 1.2** WORKING WITH U.S. GOVERNMENT AGENCIES IN BIODIVERSITY CONSERVATION 13

##### Guiding Principles for Conservation Biology 15

**ESSAY 1.3** THE ROLE OF SCIENCE IN DEFINING CONSERVATION PRIORITIES FOR NONGOVERNMENTAL ORGANIZATIONS (NGOS) 16

*Some postulates of conservation biology* 19

##### Pervasive Aspects of Conservation Biology Efforts 20

*A discipline responding to an immense crisis* 20

*A multidisciplinary science* 20

**ESSAY 1.4** A PRIVATE LANDOWNER'S PERSPECTIVE: CONSERVATION BIOLOGY AND THE RURAL LANDOWNER 21

*An inexact science* 22

*A value-laden science* 23

**BOX 1.1** WINGSPREAD STATEMENT ON THE PRECAUTIONARY PRINCIPLE 24

*A science with an evolutionary time scale* 24

*A science of eternal vigilance* 24

##### A Final Word 24

##### Summary 25

##### Questions for Discussion 25

#### CHAPTER 2

#### Global Biodiversity: Patterns and Processes 27

*Gordon H. Orians and Martha J. Groom*

---

##### What Is Biodiversity and Why Is it Important? 27

**ESSAY 2.1** HIERARCHICAL INDICATORS FOR MONITORING CHANGES IN BIODIVERSITY 28

##### Components of Biodiversity 30

*Genetic diversity* 30

*Population-level diversity* 30

*Human cultural diversity* 31

*Diversity of species* 31

**ESSAY 2.2** THE IMPORTANCE OF INDIGENOUS KNOWLEDGE SYSTEMS 32

##### How Many Species Are There? 33

##### Diversity of Higher Taxa 34

##### Diversity of Biological Communities 36

##### Ecosystem and Biome Diversity, and the World's Ecoregions 37

##### Species Richness over Geological Time 39

*Rates of species formation* 40

*Rates of extinction* 41

*Current patterns of species richness* 41

##### Patterns of Endemism 43

**BOX 2.1** THE IMPORTANCE OF  $\beta$ -DIVERSITY 44

##### Latitudinal Gradients in Species Richness 47

##### Species Richness–Energy Relationships 48

##### Disturbance and Species Richness 51

*Interactions between local and regional species richness* 52

*The importance of biodiversity* 53

**BOX 2.2** THE ECOLOGY AND MANAGEMENT OF CROP POLLINATION SERVICES 54

**The Future of Biodiversity Studies 55****ESSAY 2.3** RAPID INVENTORIES FOR CONSERVATION 56**Summary 60****Questions for Discussion 61****CHAPTER 3****Threats to Biodiversity 63***Martha J. Groom***Major Threats to Biodiversity and Their Interaction 64****ESSAY 3.1** KILLER WHALES AS SENTINELS OF GLOBAL POLLUTION 66**ESSAY 3.2** INFECTIOUS DISEASE AND THE CONSERVATION OF BIODIVERSITY 67**Anthropogenic Extinctions and Their Community and Ecosystem Impacts 70***Indirect impacts of extinctions on animal and plant communities 72***BOX 3.1** CASCADE EFFECTS RESULTING FROM LOSS OF A CRITICAL SPECIES OR TAXON, OR FROM SPECIES INTRODUCTIONS 73**Current Patterns of Global Endangerment 74***Globally threatened species 75***BOX 3.2** THE IUCN RED LIST SYSTEM 76*Globally threatened processes 78***ESSAY 3.3** AN ENDANGERED BIOLOGICAL PHENOMENON 79*Where are species most at risk worldwide? 81**Endangered species in the United States 81**Threatened species in other countries 83***BOX 3.3** HAVE WE SET IN MOTION THE SIXTH MASS EXTINCTION EVENT? 85**What Types of Species Are Most Vulnerable to Extinction? 86***Species vulnerability due to specialization 86**Vulnerability of rare species 87**“Bad luck”: Extrinsic causes of extinction due to human activities 88**Economic and social contexts of endangerment 89***Responses to the Biodiversity Crisis 89****CASE STUDY 3.1** ENIGMATIC DECLINES AND DISAPPEARANCES OF AMPHIBIAN POPULATIONS 93**CASE STUDY 3.2** HOPE FOR A HOTSPOT 99**CASE STUDY 3.3** KEY INTERNATIONAL AND U.S. LAWS GOVERNING MANAGEMENT AND CONSERVATION OF BIODIVERSITY 104**Summary 108****Questions for Discussion 109****CHAPTER 4****Conservation Values and Ethics 111***J. Baird Callicott***The Value of Biodiversity 111***Instrumental value 111**Intrinsic value 113***Monetizing the Value of Biodiversity 115****ESSAY 4.1** OUR DUTIES TO ENDANGERED SPECIES 116**Conservation Ethics 119***Anthropocentrism 119**The Judeo-Christian stewardship conservation ethic 120**Traditional non-Western environmental ethics 121***Biocentrism 124****ESSAY 4.2** MONKS, TEMPLES, AND TREES: THE SPIRIT OF DIVERSITY 125**Ecocentrism 127****ESSAY 4.3** THE IMPORTANCE OF VALUE SYSTEMS IN MANAGEMENT: CONSIDERATIONS IN DESERT FISH MANAGEMENT 130**CASE STUDY 4.1** CYPRESS FOREST CONSERVATION ON TAIWAN: A QUESTION OF VALUE 131**Summary 134****Questions for Discussion 135****CHAPTER 5****Ecological Economics and Nature Conservation 137***Gareth Edwards-Jones***Why Do We Need Ecological Economics? 137****ESSAY 5.1** STEADY-STATE ECONOMICS 139**Cost-Benefit Analysis and its Application to Conservation 140****ESSAY 5.2** VALUATION OF ECOLOGICAL SYSTEMS 141*Project definition 142**Classification of impacts 143**Conversion into monetary terms 143***What Kind of Values Does Biodiversity Have? 144****Converting Biodiversity's Value into Monetary Terms 146***Conventional market approaches 146**Implicit market techniques 147**Hypothetical market 147**Examples of monetary values placed on biodiversity 148*

**BOX 5.1** ESTIMATING THE TOTAL ECONOMIC VALUE OF SIN-HARAJA RAIN FOREST, SRI LANKA 149

*Controversy surrounding the use of CVM* 150

### Project Assessment in CBA 151

**ESSAY 5.3** A NON-ECONOMIC VIEW OF THE VALUE OF BIODIVERSITY 152

*Net present value (NPV)* 155

**BOX 5.2** DISCOUNTING 156

*Sensitivity analysis* 157

*Objections to CBA* 157

*How can we best use CBA in conservation?* 158

### Alternative Decision-Making Methods for the Environment 159

*Environmental impact assessment* 159

*Risk assessment and management* 159

*Adding nonsubstitutability to CBA* 161

**CASE STUDY 5.1** THE COSTS OF BIODIVERSITY CONSERVATION: THE CASE OF UGANDA 162

**CASE STUDY 5.2** COSTS AND BENEFITS OF RESTORATION OF POST-INDUSTRIAL LANDSCAPES 166

**Summary** 168

**Questions for Discussion** 169

## UNIT II

### Focus on Primary Threats to Biodiversity 171

#### CHAPTER 6

### Habitat Degradation and Loss 173

*Martha J. Groom and Carly H. Vynne*

#### What Constitutes Habitat Degradation and When Is Habitat “Lost”? 174

#### Patterns of Habitat Transformation on Land and In the Sea 176

*Forest systems and deforestation patterns* 177

*Loss of and damage to grassland, savanna, and shrubland habitats* 179

*Degradation of freshwater systems* 180

*Degradation of marine ecosystems* 181

#### Human Activities That Cause Habitat Degradation 182

*Agriculture* 184

*Extractive activities* 185

**ESSAY 6.1** SCRAPING BOTTOM: THE IMPACT OF FISHING ON SEAFLOOR HABITATS 186

*Urbanization and infrastructure development* 187

*War and violent conflict* 188

#### Pollution as a Form of Habitat Degradation 188

*Light pollution* 188

*Air pollution and acid rain* 189

**ESSAY 6.2** FOREST OZONE INJURY: HOW PHYSIOLOGY AND CLIMATE PLAY A ROLE 190

*Solid waste and plastics* 191

*Chemical pollution* 192

*Habitat degradation due to excessive nitrogen inputs* 193

*Eutrophication* 194

**ESSAY 6.3** ENDOCRINE DISRUPTING CONTAMINANTS, CONSERVATION, AND THE FUTURE 195

#### Protecting What’s Left: Approaches to Global Habitat Conservation 197

*Biodiversity hotspots* 197

*The “Global 200” ecoregions* 198

*Crisis ecoregions* 199

*Wilderness protection* 200

*Other habitat conservation priority-setting approaches* 200

#### Conservation of Habitats: The How 201

**ESSAY 6.4** DEBT-FOR-NATURE SWAPS 203

**CASE STUDY 6.1** THE IMPORTANCE OF LAND USE HISTORY TO CONSERVATION BIOLOGY 204

**CASE STUDY 6.2** PROMOTING WILDLIFE CONSERVATION IN AGRICULTURAL LANDSCAPES 208

**Summary** 211

**Questions for Discussion** 212

#### CHAPTER 7

### Habitat Fragmentation 213

*Reed Noss, Blair Csuti, and Martha J. Groom*

**ESSAY 7.1** HABITAT “SHREDDING” 214

#### Fragmentation and Heterogeneity 216

**ESSAY 7.2** MOSAICS AND PATCH DYNAMICS 218

#### The Fragmentation Process 219

**BOX 7.1** QUANTIFYING LANDSCAPE PATTERN AND FRAGMENTATION 220

#### Biological Consequences of Fragmentation 223

*Initial exclusion* 223

*Crowding effect* 223

*Insularization and area effects* 223

- Isolation* 226
- Edge effects* 228
- Matrix effects* 230
- The special problem of roads* 230
- Species invasions* 232
- Effects on ecological processes* 232

**Nested Species Distribution Patterns 234**

**Species Vulnerable to Fragmentation 235**

**Fragmentation versus Habitat Loss, and Regional Differences 235**

**BOX 7.2** SPECIES VULNERABLE TO FRAGMENTATION 236

**The Problem of Climate Change 239**

**Conclusions and Recommendations 239**

**CASE STUDY 7.1** SUBDIVIDING THE WEST 241

**CASE STUDY 7.2** THE FRAGMENTATION OF AQUATIC ECOSYSTEMS AND THE ALTERATION OF HYDROLOGIC CONNECTIVITY: NEGLECTED DIMENSIONS OF CONSERVATION ECOLOGY 243

**CASE STUDY 7.3** DISSECTING NATURE: THE ISLANDS OF LAGO GURI 246

**Summary 250**

**Questions for Discussion 251**

**CHAPTER 8**

**Overexploitation 253**

*John D. Reynolds and Carlos A. Peres*

**History of, and Motivations for, Exploitation 253**

**Impacts of Exploitation on Target Species 254**

*Tropical terrestrial ecosystems* 255

**ESSAY 8.1** EAST AFRICAN BLACKWOOD EXPLOITATION 256

*Temperate terrestrial ecosystems* 258

*Aquatic ecosystems* 260

**Impacts of Exploitation on Nontarget Species and Ecosystems 262**

*Tropical terrestrial ecosystems* 262

*Temperate ecosystems* 263

*Aquatic ecosystems* 264

**Biological Theory of Sustainable Exploitation 265**

*Stability of exploitation* 267

*Constant quota exploitation* 267

*Proportional (constant effort) exploitation* 268

*Threshold exploitation* 268

*Bioeconomics* 269

*Open access and the tragedy of the commons* 269

**ESSAY 8.2** USING ECONOMIC ANALYSIS TO BOLSTER CONSERVATION EFFORTS: MARINE AQUARIA AND CORAL REEFS 270

*Discounting* 272

**Comparison of Methods for Calculating Sustainable Yields 272**

*Surplus production* 272

*Yield per recruit* 273

*Full demography* 273

*Adjustments based on recent results* 274

*Demographic rules of thumb* 274

**BOX 8.1** ADJUSTMENTS OF QUOTAS FOR THE MARTEN (*MARTES AMERICANA*) ACCORDING TO PREVIOUS RESULTS 275

*Spatial and temporal comparisons* 276

**Sustainable Use Meets Biodiversity 276**

**CASE STUDY 8.1** OVEREXPLOITATION OF HIGHLY VULNERABLE SPECIES: RATIONAL MANAGEMENT AND RESTORATION OF SHARKS 278

**CASE STUDY 8.2** THE BUSHMEAT CRISIS: APPROACHES FOR CONSERVATION 280

**CASE STUDY 8.3** MANAGING NATURAL TROPICAL FORESTS FOR TIMBER: EXPERIENCES, CHALLENGES, AND OPPORTUNITIES 283

**Summary 290**

**Questions for Discussion 291**

**CHAPTER 9**

**Species Invasions 293**

*Marjorie Wonham*

**What Are the Conservation Implications of Introduced Species? 294**

**What Are the Impacts of Invasions? 295**

*Population and community impacts* 295

**ESSAY 9.1** MAINTAINING AN OPEN MIND ON NONNATIVE SPECIES 296

*Morphological and behavioral impacts* 302

*Genetic and evolutionary impacts* 302

*Ecosystem impacts* 303

*Measuring invader impacts* 304

**BOX 9.1** UNDERSTANDING THE IMPACTS OF NONNATIVE SPECIES 305

**What Factors Determine Whether a Nonnative Species Becomes Invasive? 306**

*Propagule pressure* 307

**ESSAY 9.2** GLOBAL EXCHANGE 308

*Invading species characteristics* 309

*Invaded community characteristics* 311

**How Are Species Introduced? 314**

*Unintentional pathways* 314

*Intentional pathways* 316

**How Do We Manage Species Invasions? 316***Invasion control 316**Species-based control 316***BOX 9.2** USING MODELS TO IMPROVE CONTROL OF INTRODUCED RABBITS IN AUSTRALIA? 318*Invasion prevention 318***CASE STUDY 9.1** INVADERS IN AN INVASIBLE LAND: THE CASE OF THE NORTH AMERICAN BEAVER (*CASTOR CANADENSIS*) IN THE TIERRA DEL FUEGO–CAPE HORN REGION OF SOUTH AMERICA 321**CASE STUDY 9.2** TRACKING AQUATIC INVASIVE SPECIES 323**CASE STUDY 9.3** WHEN A BEAUTY TURNS BEAST 325**CASE STUDY 9.4** BIOLOGICAL CONTROL AS A CONSERVATION TOOL 327**Summary 330****Questions for Discussion 319****CHAPTER 10****Biological Impacts of Climate Change 333***Camille Parmesan and John Matthews***The Nature of Climate Change 334***Climate change through the ages 334**Human enhancement of the greenhouse effect 336**Mechanisms regulating the global energy budget 337***Current and Future Climate Change 338***Temperature and precipitation changes 338**Oceans: Change in sea level and circulation 340***Predicted Biological Impacts 342***Responses to extreme weather 342***Observed Biological Impacts of Climate Change 344***Detection and attribution 344**Evolutionary and morphological changes 344**Phenological shifts 345**Abundance changes and community reassembly 346**Range shifts 348**Sea level rise 349**Direct effects of carbon dioxide 350**Ecosystem process changes 350**The global picture: A synthesis of biological impacts 351***Conservation Implications of Climate Change 352***Extinctions 352**Responses to climate change by resource managers 354**Climate change and conservation policy 355**Responses to climate change at national and international levels 356**The role of government in climate change policy 356**Major themes in climate change negotiations 356**The future of climate change policy 359***CASE STUDY 10.1** CHALLENGES TO PREDICTING INDIRECT EFFECTS OF CLIMATE CHANGE 360**CASE STUDY 10.2** CLIMATE CHANGE, EXTINCTION, AND THE UNCERTAIN FUTURE OF A NEOTROPICAL CLOUD FOREST COMMUNITY 364**CASE STUDY 10.3** ADAPTING COASTAL LOWLANDS TO RISING SEAS 366**CASE STUDY 10.4** CLIMATE CHANGE AND COASTAL MIGRANT BIRDS 370**Summary 373****Questions for Discussion 374****CHAPTER 11****Conservation Genetics: The Use and Importance of Genetic Information 375***Kim T. Scribner, Gary K. Meffe, and Martha J. Groom***Genetic Variation: What Is It and Why Is It Important? 377***Variation within individuals 377***BOX 11.1** MEASURES OF GENETIC DIVERSITY 378*Variation among individuals 380**Variation among populations 381**Variation at the level of metapopulations 383***Why Is Genetic Diversity Important? 384****Forces that Affect Genetic Variation within Populations 385***The genetically effective population size ( $N_e$ ) 385***ESSAY 11.1** COADAPTATION, LOCAL ADAPTATION, AND OUTBREEDING DEPRESSION 385*Mutation 387**Genetic drift 387***BOX 11.2** ESTIMATION OF EFFECTIVE POPULATION SIZE 388*Gene flow 390**Inbreeding depression 391**Outbreeding depression 392**Natural selection 393***Using Conservation Genetics to Inform Management 394***Time scales of concern 394***Identifying and Prioritizing Groups for Conservation 394****ESSAY 11.2** A ROSE IS A ROSE IS A ROSE 396**BOX 11.3** CALCULATION OF *F*-STATISTICS 397**Genetic Information and Design and Implementation of Breeding Strategies 401***Use of pedigrees 401*

*Estimation of degree of relatedness without knowledge of pedigree relationships* 401

- Analyses of Parentage and Systems of Mating** 401
- Forensics and Species or Population Identification** 402
- Individual Identification and Estimation of Population size** 402
- Understanding Effects of Population Exploitation on Levels of Genetic Diversity** 402

**Limitations of Using Genetics in Conservation Planning** 403

- CASE STUDY 11.1** GENETICS AND DEMOGRAPHY OF GRIZZLY BEAR POPULATIONS 404
- CASE STUDY 11.2** USING GENETIC ANALYSES TO GUIDE MANAGEMENT OF PACIFIC SALMONIDS 407
- CASE STUDY 11.3** SCAT: SINGING THE WILDLIFE CONSERVATION BLUES 411

- Summary** 414
- Questions for Discussion** 415

## UNIT III

# Approaches to Solving Conservation Problems 417

---

### CHAPTER 12

## Species and Landscape Approaches to Conservation 419

*John B. Dunning Jr., Martha J. Groom, and H. Ronald Pulliam*

### Populations and How They Change 420

- Mechanisms of population regulation* 421
- Special problems of very small populations* 423
- Source–sink concepts and their application to conservation* 424
- Metapopulation concepts, threshold responses, and conservation* 427

**ESSAY 12.1** METAPOPOPULATIONS, EXTINCTION THRESHOLDS, AND CONSERVATION 429

### Modeling Approaches for Prediction and Conservation Planning 432

- Population viability analysis* 432
- The value of hierarchical analysis for understanding population change* 432

**ESSAY 12.2** POPULATION VIABILITY ANALYSIS AND CONSERVATION DECISION MAKING 433

**ESSAY 12.3** ECOLOGICALLY FUNCTIONAL POPULATIONS 435

- Landscape models for conservation* 440
- Spatially explicit population models* 442

### Challenges and Opportunities of Conservation at the Landscape Scale 444

**ESSAY 12.4** LANDSCAPE-LEVEL CONSERVATION FOR THE SEA 447

**CASE STUDY 12.1** ASSESSING EXTINCTION RISK IN NEOTROPICAL MIGRATORY SONGBIRDS: THE NEED FOR LANDSCAPE-BASED DEMOGRAPHIC MODELS 449

**CASE STUDY 12.2** LANDSCAPE CONSERVATION IN THE GREATER MADIDI LANDSCAPE, BOLIVIA: PLANNING FOR WILDLIFE ACROSS DIFFERENT SCALES AND JURISDICTIONS 453

**CASE STUDY 12.3** PUTTING THE PIECES TOGETHER: PRESERVING CRANES AND THEIR HABITATS AROUND THE WORLD 459

- Summary** 464
- Questions for Discussion** 465

### CHAPTER 13

## Ecosystem Approaches to Conservation: Responses to a Complex World 467

*Gary K. Meffe, Martha J. Groom, and C. Ronald Carroll*

### Key Elements of an Ecosystem Approach 468

- Examples of ecosystem approaches* 469
- Ecosystem management* 471
- Using ecosystem approaches to meet the goals of the Convention on Biological Diversity* 472

### Biophysical Ecosystems as Appropriate Management Units 473

**ESSAY 13.1** MARINE ECOSYSTEM-BASED MANAGEMENT: TRANSFORMING U.S. OCEAN POLICY 476

### Understanding Ecosystem Dynamics and Resilience 480

### Adaptive Management: Preparing for Change in Conservation Practice 481

*Analytic approaches used in adaptive management* 483

### Should Ecosystem Approaches Mimic Natural Processes? 484

### The Critical Role of Participatory Decision-Making Processes 485

**BOX 13.1** USING FIRE AS A NATURAL PROCESS IN ECOSYSTEM MANAGEMENT 486

**BOX 13.2** NATURAL COMMUNITY CONSERVATION PLANNING 488

**Future Directions in Ecosystem-Based Conservation 489**

**CASE STUDY 13.1** ECOSYSTEM MANAGEMENT ON "PEOPLE'S LAND" IN THE UNITED STATES 489

**CASE STUDY 13.2** CORAL BLEACHING: MANAGING FOR RESILIENCE IN A CHANGING WORLD 493

**CASE STUDY 13.3** LARGE-SCALE ECOSYSTEM MANAGEMENT: THE CHESAPEAKE BAY 498

**CASE STUDY 13.4** THE EVERGLADES: TRIALS IN ECOSYSTEM MANAGEMENT 502

**Summary 507**

**Questions for Discussion 507**

**CHAPTER 14****Protected Areas: Goals, Limitations, and Design 509**

*Hugh P. Possingham, Kerrie A. Wilson, Sandy J. Andelman, and Carly H. Vynne*

**The Current State of Protected Areas 510****Types of Protected Areas 511**

**BOX 14.1** CONVENTION ON BIOLOGICAL DIVERSITY 511

*Strict nature reserves and wilderness areas (Category I) 512*

*National parks (Category II) 512*

*Natural monuments (Category III) 513*

*Habitat/species management area (Category IV) 513*

*Protected landscape/seascape (Category V) 513*

*Managed resource protected area (Category VI) 513*

*Biosphere Reserves, Ramsar Wetlands, and World Heritage Sites 513*

*Strict protection versus multiple use 514*

**Management Effectiveness of Protected Areas 515**

**ESSAY 14.1** CONSTANT VIGILANCE: MAINTAINING A FISH PRESERVE IN THE ARID SOUTHWESTERN UNITED STATES 516

**The Need for Reserve Systems 517**

**ESSAY 14.2** GAP ANALYSIS: A SPATIAL TOOL FOR CONSERVATION BIOLOGY 518

**Approaches to Planning Reserve Systems 521**

*Systematic conservation planning 522*

*The use of surrogates for reserve system planning 524*

*Tools for systematic conservation planning 526*

**BOX 14.2** FORMULATION OF THE CONSERVATION PLANNING PROBLEM FOR DESIGNING RESERVE SYSTEMS 527

*Designing a reserve system for the Cape Floristic Region of South Africa 529*

**Confronting Threats in Protected Areas 531**

*Conservation objectives and persistence 533*

*Dynamics and uncertainty 533*

*Complex economic considerations 534*

**Incorporating Social and Cultural Contexts 534**

**CASE STUDY 14.1** CONSERVATION MANAGEMENT OF A EUROPEAN NATURAL AREA: DOÑANA NATIONAL PARK, SPAIN 536

**CASE STUDY 14.2** THE CALIFORNIA CHANNEL ISLANDS MARINE RESERVES: SCIENTISTS INFORMING POLICY AND MANAGEMENT 544

**CASE STUDY 14.3** RECONCILING THEORY AND PRACTICE IN DESIGNING A REGIONAL RESERVE SYSTEM 548

**Summary 551**

**Questions for Discussion 551**

**CHAPTER 15****Restoration of Damaged Ecosystems and Endangered Populations 553**

*Peggy L. Fiedler and Martha J. Groom*

**Ecological Restoration 553**

*Role of restoration ecology in conservation 555*

*Steps in designing and implementing ecological restorations 556*

**ESSAY 15.1** THE HARPY EAGLE CONSERVATION PROGRAM: RESEARCH, CONSERVATION, AND COMMUNITY-BASED EDUCATION TO SAVE THE NATIONAL BIRD OF PANAMA 559

**ESSAY 15.2** ACHIEVING SUCCESS IN MINE RECLAMATION: AN EXAMPLE FROM SEMIARID LANDS IN WESTERN AUSTRALIA 560

*Restoration challenges 562*

**Animal Reintroduction 565****Restoration in Marine Environments 566**

**BOX 15.1** GENETIC CONSIDERATIONS IN REINTRODUCTION 567

**Environmental Regulations that Drive Restoration Practice 568**

*Regulations in the United States 568*

*International regulations 570*

**BOX 15.2** OTHER PERTINENT U.S. LEGISLATION REQUIRING RESTORATION ACTIVITIES 570

**Concluding Thoughts 571**

**CASE STUDY 15.1** RESTORING THE NATION'S WETLANDS: WHY, WHERE, AND HOW? 571

**CASE STUDY 15.2** TEMPERATE RIVERINE ECOSYSTEM RESTORATION: THE NORTH CREEK FLOODPLAIN 574

**CASE STUDY 15.3** FROM KENYA TO COSTA RICA: SOLUTIONS FOR RESTORING TROPICAL FORESTS 578

**CASE STUDY 15.4** RESTORATION OF AN ENDANGERED SPECIES: THE BLACK-FOOTED FERRET 581

**CASE STUDY 15.5** IN THE EYE OF THE HURRICANE: EFFORTS TO SAVE THE PUERTO RICAN PARROT 586

**Summary 589**

**Questions for Discussion 589**

## CHAPTER 16

**Sustainable Development 591***C. Ronald Carroll and Martha J. Groom***What Is Sustainable Development? 591***Sustainable “growth” is not equivalent to sustainable “development” 592**How are sustainable development projects structured? 593***How Successful Are Sustainable Development Projects at Conserving Biodiversity? 594****How Can We Best Promote Sustainability? 597****CASE STUDY 16.1** ECOTOURISM AND BIODIVERSITY CONSERVATION 599**CASE STUDY 16.2** THE CHOCÓ-ANDEAN CORRIDOR: SUSTAINING LIVELIHOODS AND PROTECTING BIODIVERSITY 605**CASE STUDY 16.3** CERTIFICATION AND THE COLLINS-ALMANOR FOREST 610**CASE STUDY 16.4** COMMUNITY EMPOWERMENT AND FOOD SECURITY: LESSONS FROM ZIMBABWE’S COMMUNAL MANAGEMENT PROGRAMME FOR INDIGENOUS RESOURCES (CAMPFIRE) 613**CASE STUDY 16.5** SEA TURTLE CONSERVATION AND THE YOLNGU PEOPLE OF NORTH EAST ARNHEM LAND, AUSTRALIA 616**Summary 622****Questions for Discussion 623**

## CHAPTER 17

**The Integration of Conservation Science and Policy: The Pursuit of Knowledge Meets the Use of Knowledge 625***Deborah M. Brosnan and Martha J. Groom***The Need for Translational Scientists at the Interface of Science and Policy 626****The Interface between the Pursuit and Use of Scientific Knowledge in Conservation 627***Policy-relevant science is different from ecologically relevant science 627**Policy involves a diversity of professions 628**Knowing others’ concerns, constraints, and opportunities 628**Constraints and opportunities for conservationists 628**Necessary roles as experts and advocates for science 629**Conservation science can influence conservation policy decision 629**Scientists are not value free 629**Policymakers and the public respond to scientific information differently 629***What Is Conservation Policy? 630****Who Makes Conservation Policy? Breaking the Science–Policy Barrier 631***The best available science: Quality and quantity of scientific information for conservation decisions 633**Scientific uncertainty and risks 634***ESSAY 17.1** CONSERVATION SCIENCE AND POLICY IN THE REAL WORLD: THE HEADWATERS AGREEMENT 635**Dealing with Uncertainty and Risk through Adaptive Management 637****ESSAY 17.2** COLLABORATING FOR CONSERVATION: USING DECISION ANALYSIS TO MANAGE “FACTS” AND “VALUES” IN CONSERVATION DISPUTES 638**ESSAY 17.3** A POLICY PORTFOLIO APPROACH TO BIODIVERSITY PROTECTION ON PRIVATE LANDS 641**Being a Conservation Scientist in the Real World 643***Working with the policy process 643**Contributing to conservation policy as a conservation scientist 644***CASE STUDY 17.1** SHOULD THE SOUTHERN RESIDENT POPULATION OF ORCAS BE LISTED AS THREATENED OR ENDANGERED?: A SCIENTIFIC, LEGAL, OR POLICY DECISION? 645**CASE STUDY 17.2** ELEPHANT CONSERVATION IN SRI LANKA: INTEGRATING SCIENTIFIC INFORMATION TO GUIDE POLICY 649**CASE STUDY 17.3** MANAGEMENT OF SPOTTED OWLS: THE INTEGRATION OF SCIENCE, POLICY, POLITICS, AND LITIGATION 652**Summary 658****Questions for Discussion 659**

## CHAPTER 18

**Meeting Conservation Challenges in the Twenty-First Century 661***Martha J. Groom, C. Ronald Carroll, and Gary K. Meffe***Countering the Impacts on Biodiversity from Poverty in Many Countries and Over-Consumption in a Few Countries 661****Working with Uncertainty in Ecological, Social, Economic, and Political Systems 664***Indicators needed to describe trends and guide policy 664***ESSAY 18.1** CONSERVATION BIOLOGY IN THE TWENTY-FIRST CENTURY 665*Research approaches needed to inform decision-making 667***ESSAY 18.2** INDICATORS: IT MATTERS WHAT WE MEASURE 669

- How do we overcome uncertainties that hinder decision-making?* 671
- Responding to intensification of threats* 672
- Are Conservation Efforts Succeeding and How Can We Improve?** 673
- Enhancing conservation under the U.S. Endangered Species Act* 674
- Limited implementation and funding of conservation programs globally* 675
- Will we meet the 2010 goals of the Convention for Biological Diversity?* 676
- Improving assessment of conservation efforts* 676
- BOX 18.1** PROSPECTS FOR ACHIEVING THE 2010 GOALS OF THE CONVENTION FOR BIOLOGICAL DIVERSITY 677
- Influencing People's Habits: Reducing Destructive Impacts** 679
- Making sustainable choices more attractive* 680
- ESSAY 18.3** THE IMPORTANCE OF PUBLIC EDUCATION FOR BIOLOGICAL CONSERVATION 681
- Encouraging conservation through incentives* 683
- Fostering sustainable use* 684
- ESSAY 18.4** COUNTRYSIDE BIOGEOGRAPHY 685
- Our Decisions Will Determine the Fate of Biodiversity** 687
- CASE STUDY 18.1** THE NATURE CONSERVANCY'S APPROACH TO MEASURING BIODIVERSITY STATUS AND THE EFFECTIVENESS OF CONSERVATION STRATEGIES 688
